SCALEX

Fast acting descaler

Scalex is a fast-acting descaler to remove unsightly water scale and algae from car wash areas, toilets and porcelain, non-ferrous and ferrous surfaces.

- **Acid based concentrated cleaner**
- **Removes unsightly water scale and algae**
- **Safe on glass and aluminium when used as directed**
- **Easy to apply - easy to rinse away**
- **Rapid results**
- **No unpleasant fumes**
- **Safer than hydrochloric acid based products**
- **Biodegradable surfactants**

DIRECTIONS FOR USE

Car Wash Area Cleaning:

For badly scaled areas Scalex should be used undiluted. For regular cleaning use a dilution rate of 1 part Scalex to 8 parts water. Apply with a non-misting sprayer and agitate with a brush. Allow to act for 5-10 minutes and rinse with plenty of water.

Toilet and Porcelain Cleaning:

Dilute with water (warm is more efficient) dependent upon degree of staining to be removed. It is sometimes necessary to use neat or up to a 1:4 dilution initially. Maintenance cleaning thereafter calls for a solution of up to 1:20 with water.

DO NOT USE ON ENAMEL SURFACES

Non-Ferrous Metal Surfaces:

Oxidisation and tarnish is easily removed from brass, bronze and similar materials by applications between neat and 1:40. Initial cleaning of badly stained surfaces may require neat application with brush, swab or spray. Allow to stand for about 15 minutes. Then rinse clean with water. Maintenance treatment requires a dilution of up to 1:40 dependent upon degree of staining.

Ferrous Surfaces:

Application neat or in strong dilution will remove light rust.
